REVISED SCHEDULE FOR THE LIKTANUR II

Enclosed is the revised schedule for the Likatanur II through October 4, 1979. These revisions have been coordinated with the Party Chiefs.

In anticipation that the contract with U.S. Oceanography will be extended for an additional year, September 16, 1979, through September 16, 1980, it is important that you plan your schedule accordingly. The cost of DOE will vary very little whether the Likatanur II is in port or at sea, so it is certainly in our best interest to use the vessel as fully as the contract permits.

We want to schedule a users meeting to be held at Livermore on July 24, 1979 and ask each of you to respond by June 29 as to whether this is convenient and your interest to attend.

We look forward to your reply.

Sincerely,

W. J. Stanley
